HACC Dental Hygiene Clinic Fast Facts

- In 2008, the clinic served approximately 588 clinic patients in the spring semester and 390 in the fall semester.
- The spring semester has both first and second year students in the clinic - in the fall only second-year students are seeing patients.
- Also, more than 300 Capital Area Head Start children on Thursday mornings throughout the year. Students also see patients off campus at their rotation sites.

Free Day of Care

- Saturday, March 28 is the Free Day of Care in the Dental Hygiene Clinic, sponsored by United Concordia Insurance Company in conjunction with the Harrisburg Area Dental Society and HACC.
- Different groups are targeted each year (not open to the public). Coming to the Dental Hygiene Clinic this year are Lebanon Area Head Start children, children who were seen in HACC’s clinic during Sealant Saturday on Feb. 21 and who need dental restorations, children from a Harrisburg community center basketball team and those children that will be screened at the Whitaker Center on March 21 in conjunction with the current exhibit, "Branches, Bristles and Batteries: Toothbrushes Through Time," which is on loan from the Baltimore Dental Museum.
- Vision screenings will also be done by Davis Vision on March 28 so the children will have both a vision screening and dental care.

Grant from Highmark

- HACC received a grant from Highmark for $50,000.00 to purchase portable equipment and supplies. United Concordia is a Highmark company.
- Once the portable equipment arrives, dental hygiene students, under faculty supervision, will see Lebanon Area Head Start children in Lebanon. Previously the children received services from HACC at the dental clinic at Good Samaritan Hospital in Lebanon before it closed last June. The portable equipment will eliminate the need to transport the children across county lines.
- The supplies purchased from the grant are used in the Harrisburg Campus clinic for the Capital Area Head Start children and Medicaid patients.
- Equipment will be used for other purposes - including dental visits for autistic children in their own environment.
NOTE: Individuals on Medical Assistance or CHIP are not charged a fee for any services. Their current medical ID card must be presented at front desk upon checking in.
